## SAMPLE PAPER

### GATEWAY Exam – Financial Reporting

#### All Questions are compulsory.

#### Objective Part – A [2 marks each]

1. At 31<sup>st</sup> October 20X5 the capital structure of a company was as follows:

Ordinary share capital

36,000 shares of Rs. 5/- each      Rs. 180,000/-

Share premium account      Rs. 130,000/-

During the year ended 31 October 20X6, the company made a bonus issue of 2 shares for every 3 held, using the share premium account for the purpose, and later issued for cash another 7,500 shares at Rs. 8/- per share.

What is the company's capital structure at 31 October 20X6?

|    | Ordinary<br>Share Capital<br>Rs. | Share<br>Premium Account<br>Rs. |
|----|----------------------------------|---------------------------------|
| a) | 180,000                          | 130,000                         |
| b) | 217,500                          | 152,500                         |
| c) | 337,500                          | 32,500                          |
| d) | 487,500                          | Nil                             |

Correct Answer  
Option C

Working for understanding

|                                                                        | Rs.     |
|------------------------------------------------------------------------|---------|
| <b>BONUS ISSUE</b>                                                     |         |
| Number of shares issued in bonus issue ( $36,000 \times \frac{2}{3}$ ) | 24,000  |
| Increase in share capital ( $24,000 \times \text{Rs. } 5/-$ )          | 120,000 |
| Decrease in share premium                                              | 120,000 |
| <b>RIGHT ISSUE</b>                                                     |         |
| Share capital ( $7,500 \times \text{Rs. } 5/-$ )                       | 37,500  |
| Share premium ( $7,500 \times \text{Rs. } 3/-$ )                       | 22,500  |
| Share capital at 31 October 20X6 ( $180,000 + 120,000 + 37,500$ )      | 337,500 |
| Share premium at 31 October 20X6 ( $130,000 - 120,000 + 22,500$ )      | 32,500  |

3. Identify which **TWO** of the following are **TRUE** accounting treatments when recognizing an acquisition of a subsidiary:

- i) Contingent consideration must be measured at fair value at the time of business combination
- ii) Bargain purchase gain should be debited to statement of profit or loss
- iii) Consolidation is done on the basis of accounting concept of substance over form
- iv) All acquisition costs including the expenses directly related to the acquisition must be accounted for within equity

- a) i) & ii)
- b) i) & iii)
- c) ii) & iv)
- d) iii) & iv)

**Correct Answer**  
**Option B**

4. Pitcher acquired 75% share capital of Spoon on 1 April 20X6. Following are the extracts of statement of profit or loss for both companies for the year ended 30 September 20X6.

|               | <b>Pitcher</b>  | <b>Spoon</b>    |
|---------------|-----------------|-----------------|
|               | <b>Rs.</b>      | <b>Rs.</b>      |
| Revenue       | 85,000          | 40,700          |
| Cost of sales | <u>(57,400)</u> | <u>(19,700)</u> |
| Gross profit  | 27,600          | 21,000          |

Pitcher sold goods to Spoon for Rs. 16,000/- throughout the year. Pitcher made a gross profit of 30% on these sales. Unrealised profit on this inventory of Spoon at 30 September 20X6 was Rs. 1,200/-. The inter-company sales accrued evenly throughout the year.

**What will be the value of consolidated gross profit for the year ended 30 September 20X6?**

- a) Rs. 36,900
- b) Rs. 38,100
- c) Rs. 48,600
- d) Rs. 58,050

**Correct Answer**  
**Option A**

### SAMPLE PAPER

#### GATEWAY Exam – Financial Reporting

6. Aircel Co. bought a license from the government on 1 January 20X5 for Rs. 650 million and it has a 10 year life. It is amortized on a straight line basis. In December 20X6, a review of the sales of the products related to the license showed them to be very disappointing. As a result of this review the estimated recoverable amount of the license at 31 December 20X6 was estimated at only Rs. 475 million.

**What will be the impairment charge to statement of profit or loss for Aircel Co. for the year ended 31 December 20X6?**

- a) Rs. 45 million
- b) Rs. 65 million
- c) Rs. 110 million
- d) Rs. 175 million

**Correct Answer**  
**Option B**

#### Working for understanding

|                                                   |                   |
|---------------------------------------------------|-------------------|
| Amortization per year (650/10)                    | = Rs. 65 million  |
| Carrying value at 31 December 20X6 [650 - (65*2)] | = Rs. 520 million |
| Recoverable value                                 | = Rs. 475 million |
| Impairment (520 – 475)                            | = Rs. 45 million  |

7. Prisma Co. requires a provision for current tax for the year ended 31 October 20X6 of Rs. 5.6 million. There was an over provision of Rs. 0.7 million of the current tax liability and a deferred tax liability of Rs. 4.8 million for the year ended 31 October 20X5. At 31 October 20X6, the tax base of Prisma's net assets was Rs.14 million less than their carrying amounts. The income tax rate of Prisma is 25%.

**What will be the charge to Prisma's statement of profit or loss for income tax expense for the year ended 31 October 20X6?**

- a) Rs. 1.3 million
- b) Rs. 4.9 million
- c) Rs. 6.2 million
- d) Rs. 7.6 million

**Correct Answer**  
**Option C**

8. Fizdrink Co. has a claim on it from an employee for wrongful dismissal. The lawsuit was filed in January 20X7. The initial estimated outcomes by Fizdrink's legal advisors are as follows:

15% chance of no damages awarded  
65% chance of damages of Rs. 5 million  
20% chance of damages of Rs. 8 million

**What is the provision which Fizdrink would report in its statement of financial position as at 30 April 20X7 in respect of the lawsuit?**

- a) Rs. 8 million  
b) Rs. 4.85 million  
c) Rs. 5 million  
d) No provision required

**Correct Answer**  
**Option C**

For the lawsuit the most probable single likely outcome is normally considered to be the best estimate of the liability, i.e. Rs. 5 million..

9. On 1 July 20X7, Crisps Co. entered into an agreement to finance lease a specialist plant from the manufacturer for Rs. 1,200,000. The lease required four annual payments in advance of Rs. 300,000 each commencing on 1 July 20X7. The plant would have a useful life of four years and would be scrapped at the end of this period. The lease has an implicit rate of 9%

**What amount of finance cost would be charged to Crisps' statement of profit or loss for the year ended 31 March 20X8?**

- a) Rs. 108,000  
b) Rs. 81,000  
c) Rs. 60,750  
d) Rs. 54,000

**Correct Answer**  
**Option C**

**SAMPLE PAPER**  
**GATEWAY Exam – Financial Reporting**

**Subjective Part**

**Question-1:**

On 1 February 20X6 Primer began the construction of a new property. Purchase of land for the construction of building cost Rs. 45 million. Cost of leveling the land prior to beginning construction was Rs. 100,000. A borrowing cost of Rs. 2.5 million was incurred on the loan for construction of this property.

Cost of materials needed to construct the property was Rs. 12 million. Monthly labour costs of the construction staff were Rs. 700,000. Payments to professional advisors relating to the construction were of Rs. 300,000. Primer had to incur a cost of Rs. 590,000 for relocating the staff to work in the new building.

Primer earned an income of Rs. 410,000 from temporary use of part of the site as a car park during the construction period. Construction work was suspended for a month because of bad weather condition and some unforeseen power generation issue.

**Required:**

Calculate the total cost of property of Primer when the construction is completed on 31 December 20X6. **(8 marks)**

**Ans-1**

|                                   | <b>Rs. Million</b> |
|-----------------------------------|--------------------|
| Cost of land                      | 45                 |
| Cost of leveling the land         | 0.1                |
| Borrowing cost                    | 2.5                |
| Cost of materials in construction | 12                 |
| Labour cost (0.7*10)              | 7                  |
| Payment to professional advisors  | 0.3                |
| <b>TOTAL</b>                      | <b>66.9</b>        |

Cost of relocation of employees and income from temporary use will not be adjusted in the cost of asset.

**Pakistan Institute of Public Finance Accountants**  
**SAMPLE PAPER**  
**GATEWAY Exam – Financial Reporting**

**Question-2:**

Pharma is a listed entity preparing its financial statements for the year ended 31 March 20X8.

On 1 October 20X6 Pharma began a project to find a new vaccination. Expenses relating to the project of Rs. 4 million were charged in the statement of profit or loss in the year ended 31 March 20X7. Further costs of Rs. 3 million were incurred in the three-month period to 30 June 20X7. On that date it became apparent that the project was technically feasible and commercially viable.

Further expenditure of Rs. 6 million was incurred in the six-month period from 1 July 20X7 to 31 December 20X7. The production of the new product, which began on 1 January 20X8, was expected to generate revenue of at least Rs. 1.2 million per annum over the 10-year period commencing 1 January 20X8.

**Required:**

Calculate the impact of the above transactions on financial statements of Pharma for the year ended 31 March 20X8. (7 marks)

**Ans-2**

As per IAS 38 *Intangible Assets*, only costs incurred after the conditions have been satisfied can be capitalized. Therefore, the development cost capitalized in this case will be Rs. 6 million. All previous costs must be expensed to statement of profit or loss, even those arising earlier in the same accounting period.

Amortization of the capitalized costs begins when the commercial production of the product begins. In this case, amortization of only three months will be charged as commercial production began on 1 January 20X8. A full years charge would be Rs. 600,000 (6 million/10). The charge in the year ended 31 March 20X8 is Rs. 150,000 (600,000 x 3/12).

The carrying value at the 31 March 20X8 will be calculated by deducting accumulated amortization from the cost of development expenditure. The working would be as follows:

|                                                   |                                      |
|---------------------------------------------------|--------------------------------------|
| Carrying value in statement of financial position | = Cost less Accumulated amortization |
|                                                   | = 6,000,000 – 150,000                |
|                                                   | = Rs. 5,850,000                      |

The relevant expenses to be shown in statement of profit or loss for the year ended 31 March 20X8 are as follows:

|                      |                 |
|----------------------|-----------------|
| Research expense     | = Rs. 3,000,000 |
| Amortization expense | = Rs. 150,000   |

**SAMPLE PAPER**  
**GATEWAY Exam – Financial Reporting**

**Question-3:**

During the year ended 30 June 20X6, Belta sold a specialist machinery to a customer that proved to have a manufacturing fault. The customer has returned the machine to Belta and demanded repayment of the purchase price of Rs. 7 million plus compensation for lost sales of Rs. 600,000. It is highly likely that Belta will make this payment in September 20X6. The directors of Belta consider it probable that the Rs. 5.9 million of the above amount can be recovered from the original manufacturer of the machine and this amount could reasonably be expected to be received in November 20X6.

**Required:**

Explain how both the claim and the counter-claim will be treated in the financial statements of Belta for the year ended 30 June 20X6. **(5 marks)**

**Ans-3**

The international financial reporting standard that is relevant to this issue is IAS 37 – *Provisions, contingent liabilities and contingent assets*. The amount payable by Belta to the customer of Rs. 7.6 million should be recognized as a provision in the statement of financial position at 30 June 20X6. The obligating event is the sale of goods under the warranty. There is a probable outflow of economic benefits that can be reliably estimated.

Rs. 5.9 million, the amount potentially recoverable from the manufacturer, is a contingent asset which should not be recognized in the financial statements unless the recovery is virtually certain. Where (as in this case) the recovery is probable the contingent asset should be disclosed in the notes to the financial statements.

**SAMPLE PAPER**  
**GATEWAY Exam – Financial Reporting**

**Question-4:**

Define an operating segment as per IFRS 8 *Operating segments*. List the criteria for aggregating two or more operating segments. **(5 marks)**

**Ans-4**

**Definition**

- a) An *operating segment* is a component of an entity:
- b) That engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the same entity),
- c) Whose operating results are regularly reviewed by the entity's chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available.

**Aggregation criteria**

Two or more operating segments may be aggregated if the segments have similar economic characteristics, and the segments are similar in **each** of the following aspects:

- a. The nature of the products or services;
- b. The nature of the production process;
- c. The type or class of customer for their products or services;
- d. The methods used to distribute their products or provide their services; and
- e. If applicable, the nature of the regulatory environment.

**GATEWAY Exam – Management Accounting**

**All Questions are compulsory.**

**Objective Part – A [2 marks each]**

1. Company is considering a construction contract which would require 500 tonnes of Cement and 600 tonnes of Concrete. Stock situation is as follows:

| Material Type | Stock in Hand<br>(tonnes) | Book Value<br>(Rs.'000) | Realizable<br>Value (Rs.'000) | Repurchase Price<br>(Rs. / unit) |
|---------------|---------------------------|-------------------------|-------------------------------|----------------------------------|
| Cement        | 1000                      | 5000                    | 3500                          | 5                                |
| Concrete      | 400                       | 4500                    | 4000                          | 3                                |
| Steel         | 350                       | 2000                    | 1500                          | 4                                |

Cement is being regularly used by the company on their other contracts. Concrete has no further use in other contracts.

What is the Relevant Cost of the Material for the contract in consideration?

- a. Rs.7500
- b. Rs.7,100,000
- c. Rs.5,000,000
- d. Rs.7,100

**Correct Answer**  
**Option B**

4. Aged Debtor Analysis of a company shows the following results in relation to how Debts are cleared by their customers.

|                                             |
|---------------------------------------------|
| 50% pay in the month of Sale                |
| 30% pay in the month following that of Sale |
| 10% pay in the second month after Sale      |
| 10% of Sale is never recovered              |

Company offers a 10% settlement discount to anyone who pays in the same month as that of Sale. Sales information for the forthcoming quarter is as follows:

| Month    | Sale Value (Rs.) |
|----------|------------------|
| October  | 50,000           |
| November | 100,000          |
| December | 60,000           |

What is the forecast Cash Receipts from Debtors in the month of December considering the trend in Aged Debtor Analysis will continue?

- a. Rs.57,000
- b. Rs.65,000
- c. Rs.70,000
- d. Rs.62,000

**Correct Answer**  
**Option D**

5. There are two popular methods to measure the divisional performance namely ROCE (Return on Capital Employed) and RI (Residual Interest). Which of them should be used to compare two projects with different levels of investment?

- a. ROCE
- b. Both of them
- c. RI
- d. Neither of them

**Correct Answer**  
**Option A**

**Pakistan Institute of Public Finance Accountants**  
**SAMPLE PAPER**

**Question-1:**

Bilal & sons is a construction contractor and specialises in the construction of restaurants. The profitability has been good in the recent years and expanding the customer base is currently sought by the directors as the only way of raising revenue in the industry. We have been approached by a leading restaurant chain in another city who wants to have their own purpose built restaurant in our city, the first in the series of many which they have planned. Directors due to the significance of this project to our business are considering using Relevant Costing to Quote a price to the restaurant chain. The following information is relevant to the project:

1. Ten thousand bags of Cement will be required on the project whereas the company only has five thousand bags of Cement in stock. The repurchase price from market is Rs.5 per bag. Cement is used regularly by the business.
2. Five hundred labour hours will be required on the project and the labour currently has two hundred hours spare capacity. Overtime can be done at the rate of Rs.10 per hour which is double than that of basic rate in normal hours. The workers can also be diverted from another job where they are paid the same basic rate and the contribution earned is Rs.3 per hour.
3. Supervisor will also be required at the project site and would be required to give 3 hours a day. He is currently paid a salary of Rs.25,000 and will be paid an extra Rs.50 per day as travelling expense for the whole project duration that is 200 days.
4. Directors require to make a 25% margin on this Project using the relevant cost.

**Required:**

**Calculate the Relevant Cost of the Project and the Price Quote that Bilal & sons should make. (8 marks)**

**Marking Scheme**

| Description                                       | Marks |
|---------------------------------------------------|-------|
| Cement Relevant Cost<br>(10000 x Rs.5) = Rs.50000 | 1     |
| Labour Relevant Cost<br>(200 x Rs.0) = 0          | 1     |
| Lower off<br>(300 x Rs.10) = Rs.3000<br>&         | 2     |

### Question-2:

The company is going through their budgeting phase and the budget manual has been completed. The following information is relevant in the making of the budget, the data is based on the forecast done by the directors.

Two Types of Material is required to produce the company's main product called AZE namely Tee and Dee. There is a Sales Demand of 50000 units of AZE in the market which the company needs to fulfill on its own. The stock situation of both the Materials and Product AZE is given below:

| Material Type | Stock in hand (kgs) | Anticipated Closing Stock (kgs) |
|---------------|---------------------|---------------------------------|
| Tee           | 5,000               | 8,000                           |
| Dee           | 4,000               | 5,000                           |

| Product Name | Stock in hand (units) | Anticipated Closing Stock (units) |
|--------------|-----------------------|-----------------------------------|
| AZE          | 800                   | 700                               |

One product of AZE requires 4 kg of Tee and 5kg of Dee.  
Purchase Prices Information:

| Material Type | Rs. / kg |
|---------------|----------|
| Tee           | 4        |
| Dee           | 2        |

**Pakistan Institute of Public Finance Accountants**  
**SAMPLE PAPER**  
**GATEWAY Exam – Management Accounting**

**Question-3:**

A company is considering a project to invest on which will last the next 5 years and has the following cash flows anticipated as of now. They have approached you, the financial consultant to help them with this decision using the Investment Appraisal techniques. They are inclined towards using a Net Present Value approach and are also concerned about being informed about the Time Value of Money concept that NPV approach is based upon.

| Year | Cash Flows ('000) |
|------|-------------------|
| 0    | (200)             |
| 1    | 50                |
| 2    | 60                |
| 3    | 50                |
| 4    | 70                |
| 5    | 80                |

The discount factor relevant for this investment is 12%. The investment made in Year 0 will have no residual value at the end of the project.

**Required:**

1. Explain the Time Value of Money Concept
2. Calculate Net Present Value of the Project
3. Suggest whether the company should accept or reject the project based on your findings in 2.

**Marking Scheme**

| Description                                                                                                                                                                             | Marks |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| 1. Time Value of Money<br>- Relates to inflation<br>- Things you can buy for in now will cost more later                                                                                | 1     |

**Question-4:**

A successful airline company is deciding to start their operations in the country of X-land and Y-land. The initial feasibility is being worked upon and of the major concern as of this point is that of the pricing of the tickets for inter country flights as this is the point which will leave an impression on the customers as to level of quality the services we can offer.

**X-land**

X-land is a financially stable country and is currently growing rapidly in terms of urbanization & new businesses pouring in because of it being established as an economic corridor to the major countries besides it. There had been quite some disruption due to the terrorist activity but now as it is resolved, its prominence is getting clearer to businesses around the world. The upper-middle and upper class are mostly consisting of high-level employees and businessmen who are frequent airline users. Currently these customers are not satisfied with the level of service the local airlines are providing and this seems to be a perfect chance for our company to expand in there.

**Y-land**

Y-land is a country made up of a series of islands and has a growing economy but nowhere near as strong as X-land. Industry is growing and foreigners are the main working force which is supporting the industry with their expertise & knowledge. The government has been giving many subsidies to the businesses who want to expand in the country and have approached our company too. People in Y-land are not financially well-off and do not live luxurious lives but due to the geographical situation of the country most people have to take ferries to other islands (which are limited due to various reasons) or the local airline service which due to monopoly charges quite high for tickets. This means that most of the working class has issues with the current travelling situation.
